

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. TRANSFER OF SECURITIES.

In accordance with the requirements of section 1, chapter 141, Laws of 1883, all moneys and securities constituting the endowment and interest funds of the State Agricultural College were, on March 30, 1883, by the authorities of the college, transferred to the custody of the State Treasurer, and since that date all transactions on account of those funds have been with this office.

The amounts thus transferred are here given—

Cash.....	\$6,522 34
Contracts and notes.....	102,819 05
Bonds.....	284,460 66

INVESTED FUNDS.

The following statement shows amounts invested in United States, State and municipal securities:

Permanent school fund.....	\$2,837,335 17
University permanent fund.....	71,248 00
Normal school permanent fund.....	54,550 00

The cash balances in the same funds are as follows:

Permanent school fund.....	\$115,729 24
University permanent fund.....	7,618 29
Normal school permanent fund.....	5,200 71

It is believed that by October 1, 1884, the School Fund Commissioners will have invested all of above balances.

In addition to the foregoing, there are deposited with the State Treasurer, securities belonging to the State Agricultural College as follows:

Bonds.....	\$331,978 49
Notes and contracts.....	121,590 69

STATE DEBT.

Since the last report from this department State bonds have matured as follows:

On July 1, 1883.....	\$61,800 00
On July 1, 1884.....	189,675 00
Total.....	\$251,475 00

Of this amount, \$246,475 has been presented and paid—\$134,125 of it since the preparation of this report. For the remaining \$5,000, funds have been placed with the fiscal agent of the State in the city of New York.

As there was not a sufficient amount of cash in the sinking fund to redeem the above amount of bonds, the Sinking Fund Commissioners directed the sale of \$98,600 of United States bonds held by the fund. Their order was complied with in June last: the bonds were sold at \$1.19½, the amount of premium realized being \$18,980.50. As the bonds were originally purchased at but little above par, the investment has been profitable to the sinking fund.

The indebtedness of the State at the present time—including the \$5,000, for which provision has been made—is \$935,500, owned as follows:

By the permanent school fund.....	\$544,500 00
“ sinking fund.....	61,000 00
“ University permanent fund.....	9,000 00
“ individuals, corporations, etc.....	321,000 00
Total.....	<u>\$935,500 00</u>

Of this amount there will become due as follows:

July 1, 1886.....	\$100,000 00
July 1, 1887.....	15,500 00
Total.....	<u>\$115,500 00</u>

The proceeds to be derived from the sale of the \$61,000 of State bonds now held in the sinking fund, together with the cash balance in that fund and the amount of tax to be collected if the present levy of one-tenth of a mill is continued, will amply provide for payment of above sum of \$115,500 at maturity thereof.

INTEREST FUND.

The decrease in the indebtedness of the State is necessarily accompanied by a decrease in the interest charge. The rate of levy for interest can safely be reduced one-tenth of a mill, making it three-tenths instead of four-tenths, as it has been for some years past.

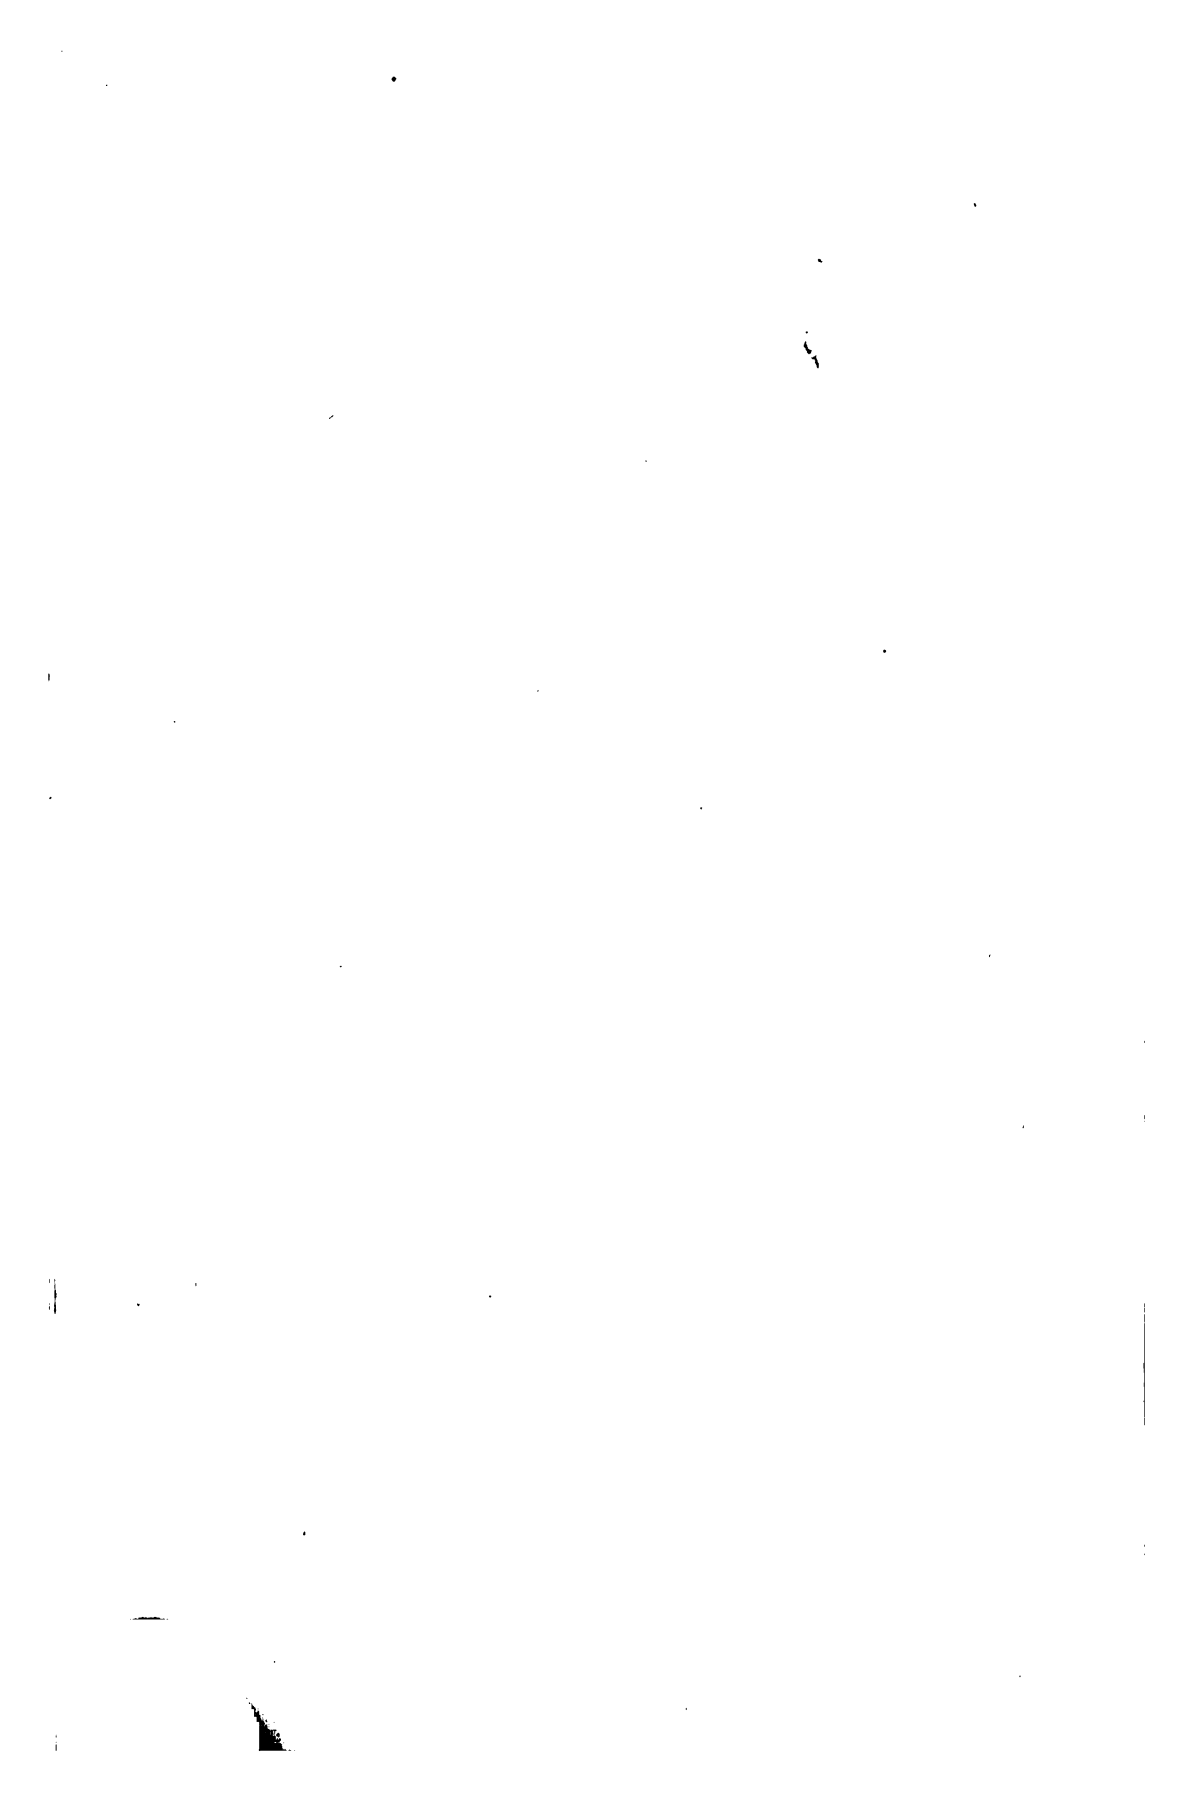

AMENDMENTS.

In this connection, and in conclusion, I wish to call attention to the propriety of and the necessity for the creation by the Legislature of a committee to whom can be referred all written recommendations by State officers concerning defects and irregularities in the law by them discovered while engaged in administering the affairs of their several departments, and before which committee such officers may appear and verbally suggest such amendments as do not readily admit of explanation in writing. Some very desirable amendments occur to me, but they can be explained here only at great length, and perhaps then not clearly; therefore I have thought best not to attempt an explanation. If such a committee should be created, I am of the opinion that much good could be accomplished through its action.

Very respectfully,

SAMUEL T. HOWE,

State Treasurer.

There is an error in statement of General Revenue and Capitol Extension funds for 1884, pp. 138, 141, which was not discovered in time to correct in the report. The balance in the Revenue fund should be \$400 less, and disbursements \$400 greater; while in Capitol Extension fund the balance should be the same amount greater, and the disbursements less. It does not change amount received. Error caused by charging a redeemed warrant to wrong fund.
